ELUTRIATION, CONTINUOUS FLOW AND ZONAL ROTORS						
	Rotor Type	Part No.	Max Speed (rpm)	Max RCF, x g	k Factor	Elutriation Boundary
	JCF-Z Large Core	357521	20,000	39,900	293	—
	JCF-Z Standard Core	335140	20,000	39,900	100	—
	JCF-Z Zonal Core	354006	20,000	39,900	710	—
	JCF-Z Reorienting Gradient Core	354005	20,000	39,000	779	—
	JCS-Z Small Core	357544	20,000	36,300	281	—
	JE-5.0	356900	5,000	4,700	—	86 mm (2,410 g)

Maximum rotor speeds may differ between instrument models.

Dual-Locking Lids provide sample containment by enabling the rotor to remain sealed while being transported to a biocontainment hood.

*Single-locking lid versions of these rotors are not BioCertified.

BIOC **BioCertified** is a term used to describe our products which have been tested and validated to demonstrate containment of microbiological aerosols by an independent, third-party facility (Health Protection Agency, Porton Down, UK or USAMRIID, Ft. Detrick, MD, USA). Improper use or maintenance may affect seal integrity and, thus, containment.

*Rotor is BioCertified when used in conjunction with part number 359232 (BioSafe Aerosolve Canisters).

**Rotor is BioCertified when used in conjunction with part number 343686 (BioSafe AeroSeal Covers).

Avanti J-26S

Transform your lab’s performance.

Beckman Coulter helps create the world’s most productive and efficient laboratories by providing the finest centrifuges available. Finest, and most accommodating. Because we believe life-altering research should not be confined by the size of a lab, or the size of its throughput.

With the Avanti Series, we’ve set an all-new standard for enhanced performance and flexibility. Limits are now a thing of the past. In the footsteps of our founder, Beckman Coulter remains dedicated to your resourcefulness.

Service and Support

When you invest in Beckman Coulter instruments, you’re backed by an incomparable support organization. In North America, our 24/7 customer support center directs a team of engineers with extensive product knowledge who have the power to solve your problems quickly and efficiently. And no matter where you are in the world, as a Beckman Coulter customer you have access to experienced, courteous service. Because when your issues are taken care of, you can return your attention to critical tasks.

Beckman Coulter, the stylized logo, Aerosolve, and Avanti are trademarks of Beckman Coulter, Inc. and are registered with the USPTO. For Beckman Coulter’s worldwide office locations and phone numbers, please visit “Contact Us” at www.beckmancoulter.com

Avanti J-26S

One centrifuge. So many possibilities.

Brilliance
at every turn.

BRINGING BENCHMARK PERFORMANCE HIGHER.

Already a leader in high performance, the Avanti J-26S has been redesigned to provide even more versatility and safety. Above and beyond its existing complete BioSafety* systems, the Avanti J-26S has a more impact-resistant lid, full containment barrier, and automatic rotor identification.

But improvements aren't the only features that set the Avanti J-26S apart. It's built upon standard-setting performance, including high speed, low heat output, imbalance tolerance and low noise. Its vast range of separations only continues to grow. And its ergonomic design—with lower instrument height and hands-free door operation—remains unchanged.

Avanti J-26S

Unsurpassed global responsibility.

At Beckman Coulter, we believe that innovation and sustainability go hand-in-hand. That our products can save resources at the same time as they drive life science research forward. And there's no better example than the Avanti J-26S—our most environmentally responsible centrifuge yet.

The resin used to manufacture the Avanti J-26S is made from post-consumer recycled water bottles. In fact, it can potentially save more than three tons of landfill space annually. And it's not just the instrument itself—the packaging for the instrument is 100% recyclable, and the carton is made of 60% recycled material.

1 High performance

Application versatility: can process six liters of fermentor output in less than 10 minutes, deliver a subcellular fraction at 82,000 x g, run 24 microplates at a time, and separate live cell populations with elutriation.

2 Complete BioSafety*systems

BioCertified† rotors, instruments and labware contain microbiological aerosols, while sterile filters prevent infectious materials from being expelled into the lab environment. Together, they enhance peace of mind for users and lab managers.

3 Dual system rotor recognition

Automatically detects which rotor is installed and prevents the rotor from running above its maximum-rated speed—without shutting down the run. All to ensure the safety of your lab.

4 Friction Reduction System

Enables quicker, quieter, more energy-efficient runs with better temperature control, which improves system reliability. High-torque, switched reluctance (SR) drive technology shortens cycle times.

5 Lightweight J-Lite rotors

Consistently designed to be the most efficient rotors—for reduced run times and high g-force.

6 Ergonomic design

Lower work surface for easier rotor handling. Foot pedal opens the door and improved door design swings up and out of the way.

7 Sustainability is built in

Each instrument saves approximately 9.6 pounds of post-consumer materials from the landfill.

ORDERING INFORMATION

AVANTI J-26S SERIES CENTRIFUGE MODELS	
Non-IVD	Description
B14535	Avanti J-26S XP, 200/208/240V, 50/60 Hz
B14536	Avanti J-26S XP, 230V, 50 Hz
B14537	Avanti J-26S XP, 220V (3-phase), 50 Hz
B14538	Avanti J-26S XPI, 200/208/240V, 50/60 Hz
B14539	Avanti J-26S XPI, 230V, 50 Hz
B14540	Avanti J-26S XPI, 220V (3-phase), 50 Hz

Elutriation systems are available. Please contact your sales representative.

*BioSafe and Biosafety are terms intended to describe the enhanced biocontainment features of our products.

**SR drives are manufactured by Beckman Coulter with technology licensed from Switched Reluctance Drives Limited.
